

# Mudd plotters returned to full service

Mudd Lab plotters slowed and/or stalled today between 12:20 and 1:30PM, March 28, 2012. Plot jobs sent during this time may not have printed.

IT has located and resolved the problem and all plotters are working properly at this time.

If you received a blank plot job please bring it by the Mudd Help Desk (Mudd 103) and complete a Refund Request Form so any charges for that print job can be removed.
