

# Storage Maintenance Jan 28

Storage will be offline briefly for maintenance on Saturday, January 28. Between 8:00AM and 10:00AM, the rolling restart will result in intermittent access interruptions to personal and shared storage spaces.

Dependent services such as web sites, Subversion, and other applications or services tied to personal or departmental storage drives will be affected.

This means that for a brief time during the window, web sites may not be available.

Updates will be posted to the IT web site: <http://it.rice.edu/>
