

MyNetID web site available now

[MyNetID.rice.edu](https://mynetid.rice.edu) is a new web site for managing Rice NetID passwords. Phase I of the new web site is now live and includes the tools most frequently used by Rice faculty, staff and students: change NetID and Rice Google passwords, set up email alias addresses, identify primary email addresses published in Rice online directory, and get VPN.

The previous password management web site, apply.rice.edu, redirects to the new URL, mynetid.rice.edu. If you used apply.rice.edu in the past for tools that are not currently available in Phase I of mynetid.rice.edu, contact the IT Help Desk for assistance.

Please send your questions or feedback on the new web site to helpdesk@rice.edu.
