

# Owlnet UNIX system retires Monday Aug 2

The legacy UNIX environment called Owlnet is being retired on Monday, August 2.

Not to be confused with Owl-Space or IT-supported classrooms, this system was once used to host course accounts. All course account owners were notified multiple times by print and email in the last eight months, and active course accounts have been re-hosted elsewhere.

Please contact the Help Desk ([helpdesk@rice.edu](mailto:helpdesk@rice.edu) or 713.348.HELP) if you need further assistance with your course accounts.
