

Active Directory upgrade Sat 8AM

Active Directory, also known as ADRice, is a system that supports user authentication and authorization (permissions) for multiple IT-managed systems and services. Two of the servers hosting Active Directory will be upgraded on Saturday morning, May 24, at 8:00 AM. The maintenance will last one hour. Multiple servers support Active Directory, so no service interruptions are anticipated. Updates will be posted to the IT web site: it.rice.edu.
