

Adobe audit begins Wednesday

The software audit required by Adobe Corporation will begin Wednesday morning, March 6.

This audit scans all Rice-owned Windows computers for usage statistics on Adobe and Adobe-related software. You do not need to take any action, the scan is automatic.

You might notice a single, 15-minute slow down on your Windows computer during the scan. The scan is run only once per computer. If you notice continued sluggish performance or other unusual behavior on your Rice-owned Windows computer, please contact the Help Desk: helpdesk@rice.edu or 713.348.4357.
