

# Confluence maintenance complete

The software that runs Confluence and JIRA has been moved to new servers and appears to be up and running normally.

The following services should be operational:

- IT-Alerts, including RSS feeds to IT web sites
- Do-IT-Yourself documentation ([docs.rice.edu](https://docs.rice.edu)),
- [wiki.rice.edu](https://wiki.rice.edu) (personal or course wiki pages)
- JIRA ([issues.rice.edu](https://issues.rice.edu), a bug/issue tracking application)
